<https://www.linkedin.com/in/niranjan-khedkar123/>

Bengaluru, KA 560071

SKILLS

Advanced AI Frameworks:

LangChain · Lang Graph · Crew AI ·
RAG · Agentic AI · Vector Databases ·
Chroma · Milvus · Prompt Engineering ·
LLM Fine-tuning · LORA finetuning ·
MCP

AI/ML Platforms & LLMs

Watsonx.ai · Watson x.data ·
Watson Studio · Watson Assistant ·
Watson Discovery · Maximo · SPSS ·
Orchestrate · Claude

Data Engineering & Analytics:

Pandas · NumPy ·
SQL/NoSQL Databases · PostgreSQL ·
MongoDB · DBeaver · Data Integration

Cloud & DevOps:

Docker · Kubernetes · OpenShift ·
AWS · Hybrid-Cloud Architecture ·
DevOps Tool chains · GCP · Terraform ·
OpenShift Deployment & Monitoring

Programming & Development:

Python · SQL · FastAPI · Flask · Django ·
REST API Development · Git ·
Microservices Architecture ·
JavaScript

EDUCATION

Pillai College of Engineering

Bachelor of Technology

Mumbai 07/2019 - 07/2023

CGPA | 9.61 / 10.0

DAV PUBLIC SCHOOL

High School

Mumbai 03/2017 - 03/2019

NIRANJAN KHEDKAR

GEN-AI ENGINEER

SUMMARY

Gen-AI Engineer with 2.5+ years at IBM, specialising in enterprise AI development and production deployment. Expertise in model fine-tuning, LLM integration, and building scalable AI pipelines that deliver measurable business impact. Skilled at translating complex technical solutions into operational efficiency, with a strong foundation in bridging AI capabilities with cross-functional business requirements.

EXPERIENCE

IBM

AI/ML Engineer

Bangalore, India

11/2025 - Present

- Architect and maintain AI solutions on OpenShift container platforms, developing deep expertise in orchestration, scaling, and resource optimisation for containerised ML workloads.
- Fine-tune AI models and automation workflows to meet client-specific performance requirements, optimizing inference speed, accuracy metrics, and resource consumption based on production feedback.
- Support enterprise-scale AI systems for Fortune 500 clients including UPS, Adobe, and AT&T, ensuring 99.9%+ uptime for mission-critical automation workloads across global deployments.
- Troubleshoot and resolve complex production issues across multi-cloud environments (GCP, AWS, Azure, IBM Cloud), reducing mean time to resolution by implementing systematic debugging frameworks.
- Administer and integrate Maximo asset management and Sterling supply chain solutions within IBM's automation suite, ensuring seamless operation of enterprise resource planning and asset intelligence workflows for global customers.

IBM

AI Engineer

Bangalore, India

10/2023 - 10/2025

- Architected and deployed Multiple enterprise AI solutions using Watsonx LLMs with RAG and autonomous agents, delivering 15+ production systems worth \$10M+ in revenue across multiple Japanese clients.
- Reduced manual workflows by 40% through AI-driven automation using Crew AI, Lang Graph, and Watsonx Orchestrate, orchestrating intelligent agents that streamlined research, coding, and business process automation at enterprise scale.
- Built scalable hybrid-cloud AI infrastructure solutions with Docker, OpenShift, and Watsonx.ai.
- Led geospatial AI solutions at IBM for climate solutions, merging Weather API with analytics in the Environmental Intelligence Suite.
- Developed end-to-end MLOps solutions across multiple domains including Maximo, SPSS, EIS and Langflow solutions.
- Collaborated with Japanese clients on automation, like predictive maintenance for Japan Railways, and incident management for financial institutions, turning AI tech into business results.

KEY ACHIEVEMENTS

- IBM Employee Equity Program (EEP) Award
- 100% Club Member at IBM
- Student of the year [Batch of 2023]

CERTIFICATIONS

J.P. Morgan and Chase Co. Virtual Experience Program
Forage

JLPT N4 Certification

INTERESTS

- Reading
- Badminton

EXPERIENCE

Richin AI

AI Engineer [Freelance]

Mumbai (Remote)

07/2023 - 08/2023

- Designed, developed, and deployed an innovative chatbot solution for a finance company
- Increased customer engagement and achieved a 40% reduction in response time
- Boosted sentiment analysis system's accuracy by 18%

Sahu Technologies

Project Coordinator/Django Developer Intern

Mumbai

06/2021 - 07/2021

- Orchestrated a team of 30 peers in tasks related to template creation and web app development in Python
- Increased user engagement by 30% by developing a news aggregator within the Django framework

PROJECTS

Botanical Leaf Recognition

08/2022 - 03/2023

A project focused on identifying botanical species from leaf images

- Built a CNN-based plant classification system, achieving 94% accuracy
- Designed and integrated a user-friendly interface with image capture and real-time inference

Secure Data Transfer using Custom Cloud Solution

01/2022 - 05/2022

Project that enables secure transmission of images and documents

- Improved data security by **30%** by developing Python-based encrypted web file transfer application.
- Led a team of 4 developers, handling backend architecture and cloud infrastructure.
